

Darshan Badgujar

 Mumbai, Maharashtra |  badgujar.darshan16@gmail.com |  +91 7020966542

Summary

AI&DS graduate with strong full-stack engineering skills in Spring Boot and Angular, backed by multiple academic and client-facing projects. Built scalable web applications with modern frontend architectures and robust backend integrations. Proficient in Python, Golang, and Java with a solid grasp of CI/CD workflows and AWS deployments. Delivered high-performance systems across auction platforms, ML pipelines, and alerting tools through internships and project work.

Education

- B.E. Artificial Intelligence & Data Science, K.K.W.I.E.E.R (SPPU), Nashik 2021 – 2025 | CGPA: 8.1/10
- HSC, Ram Raj Global Jr. College, Nashik – 87.33%
- CBSE, Symbiosis School, Nashik – 81.30%

Internships

NCDEX e-Market Ltd – Software Developer Intern
Mar 2025 – Present | Spring Boot, Angular, REST APIs

- Delivered auction aggregation platform using Angular, Spring Boot, Selenium, Python
- Handled real-time feature and bugfix requests from business users
- Collaborated with QA teams to stabilize product releases; shipped 1 updates with zero production bugs

Glisten Software Pvt. Ltd. – DevOps Engineering Intern
Dec 2023 – Jan 2024 | AWS, Git, Jenkins, Ansible

- Automated CI/CD workflows for web server deployments
- Enabled deployment alerting via email APIs, cutting response time to failures by 60%

Projects

Auction & Tender Aggregator Tool | Backend Developer | Python, Selenium, Spring, Gemini Chatbot

- Scraped 10+ portals and unified data via Java Spring backend, boosting data visibility
- Embedded Gemini chatbot for natural language search across auctions

SafeShore – Real-Time Beach Safety Platform | Data Analyst | Python, Flask, Android Studio, Firebase, INCOIS API

- Built ML model (90% F1) using hybrid ensemble to classify beach safety from oceanic data
- Integrated Flask backend with mobile app and Firebase to deliver live user alerts

Zero-Day Attack Detection Model (AWS) | ML Engineer | AWS SageMaker, Python

- Deployed intrusion detection ML pipeline on AWS to flag real-time threats
- Used SageMaker for scalable model training on cyber anomaly datasets

Email Verification CLI Tool | GoLang Developer

- Built Go-based command-line utility to validate emails using SMTP/DNS
- Improved mailing list hygiene by detecting 95% of invalid addresses

Technical Skills

- Languages: Python, C/C++, GoLang, Java
- Tools: Jenkins, GitHub, Selenium
- Cloud: AWS (SageMaker, EC2)
- Libraries/Frameworks: Pandas, NumPy, Scikit-learn, Spring, Angular

Leadership & Activities

- Creative Head, Rotaract Club of Nashik Youth Force
- Team Lead, Flipkart Grid 6.0 | Team Lead, SIH (Smart India Hackathon)
- District-Level Football Player | Volunteer, Nashik Ploggers
